Assay

Assay target*

Glucose

Original target species*

Human

Type of assay*

Electrochemical

Manufacturer*

ReliOn

Platform

Premier CLASSIC

Suggested descriptor

ReliOn Human Glucose Electrochemical Glucose

Assay manufacturer catalog number*

ReliOn Premier CLASSIC Blood Glucose Monitor

Vendor/manufacturer URL*

<https://www.walmart.com/ip/ReliOn-Premier-CLASSIC-Blood-Glucose-Monitor/123456789>

Assay availability

Currently available

Validation

Add validated *equine* matrix* *Please add at least one validated matrix!*

Select or type (e.g., Blood plasma)

Add matrix

Whole blood — Matrix

Remove matrix

Add validation metric

Select or type (e.g., Recovery)

Add metric

Intra-assay CV — Metric

Remove

Value

33

Unit

mg/dL

Comment

test comment

Year of validation*

2026

Validation was*

Unsuccessful

Validation method

Insert conflict of interest

Additional information

Additional information on the assay

All tests were operated according to the manufacturer directions, with the exception that venous blood was used instead of capillary blood. Performed OST, MTT, IRT and measured glucose at X, Y, Z timepoints.

Additional information for review

Quality control was performed on the BGM at the beginning of each study day and at the start of each new test strip box using the manufacturer's control solution according to the manufacturer's instructions to ensure ongoing accuracy. There were issues with glucometer performance in cold temperatures.
